

As a user I want a visual AR indication of where my tag is so I know where my items are.		
Activities	Have a AR icon on that location	Have an arrow that points to that location
Tasks	<div>Design using relevant diagrams an overview of the AR system</div> <div>Research methods to integrate AR into the camera</div> <div>Have the website access the camera</div> <div>Form an icon to float above the exact location</div>	<div>Create an arrow that floats in front of the user</div> <div>Have the user press a button to state they have reached their location.</div> <div>Point the arrow to the location</div> <div>Make the arrow disappear when the user reaches their location</div>
Sub-tasks	<div>Have a page for viewing the tags in AR</div> <div>Make the page automatically open the camera</div>	<div>Perform a visual indicator of distance</div> <div>Congratulate via visual effects when approaching from a set distance</div>
