

As a user I want a visual AR indication of where my tag is so I know where my items are.			
Activities	Have a AR icon on that location	Have the icon space sensitive	Have a Pickup button
Tasks	<div>Research methods to integrate AR into the camera</div> <div>Design using relevant diagrams an overview of the AR system</div> <div>Integrate AR.js into the website</div> <div>Have the website access the camera</div> <div>Be able to get geo-location data in longitude and latitude</div> <div>Form an icon to float above the exact location</div>	<div>Have the icon grow in size the closer you are</div> <div>Have the user press a button to state they have reached their location.</div> <div>Have some indicator for what rotation the icons are located</div>	<div>Have a button to pickup a tag when near it</div> <div>When clicked, put the tag into "Picked" status</div> <div>Implement reminders to place tags back</div>
Sub-tasks	<div>Have a page for viewing the tags in AR</div> <div>Make the page automatically open the camera</div>	<div>Perform a visual indicator of distance</div> <div>Congratulate via visual effects when approaching from a set distance</div>
